

# USER EXPERIENCE DESIGNER

As a User Experience Designer, you will be part of our MSI UX team, and will be responsible for the research, strategy and detailed design of our MSI workflows and experiences throughout the whole project ecosystem. You will impact millions of companies throughout their journey. You will leverage qualitative and quantitative research and new technologies to craft new experiences impacting millions of Sellers across the world.

You're an innovative self-starter in driving design excellence and a strategic big-picture thinker. You have proven the ability to succeed in a highly ambiguous, fast-paced environment, the skills to work collaboratively, and the commitment to take ownership when needed.

The UX Designer will be working with product managers, executives and engineering stakeholders closely on a day-to-day basis. While this designer independently owns multiple products/features at the same time, he/she will also collaborate with other UX designers in the same team on connecting individual features to a holistic experience. This designer will share design work regularly for design team peer review, stakeholder review, and leadership.
