

Project Manager

BW SOFTWARE US CORP

Overview

BW SOFTWARE US CORP is supporting operational, modernization, and technology-driven initiatives across infrastructure and enterprise environments. We are seeking Project Managers capable of coordinating cross-functional teams, supporting project delivery, and helping drive execution across operational and technical environments.

What You'll Do

- Coordinate project activities, schedules, and deliverables
- Collaborate with technical teams, stakeholders, and operational partners
- Support reporting, documentation, and project tracking activities
- Help manage priorities, risks, and delivery timelines
- Support modernization and operational improvement initiatives
- Contribute to cross-functional coordination and project execution

Preferred Qualifications

- Experience managing technology or operational projects
- Familiarity with agile, PMO, or project delivery environments
- Strong communication and organizational skills
- Experience working across technical and business teams
- Ability to manage multiple priorities in fast-paced environments
- Experience supporting enterprise or modernization initiatives preferred

Eligibility

- U.S. Citizens, Green Card holders

Engagement

- Contract / Project-Based
- Location: Seattle, WA (Onsite Preferred)
- Hourly Range: \$60–\$70/hr depending on experience
